Started the session buying gold which he continued to hold until stopped out. Impressive composure shown however on all other assets, not chasing a negative PnL.

ARCTIC SHORES

Thinking Style	Innovation Potential	
	1 2 3 4 5 6 7 8 9 10	
Prefers tried and tested approaches. Likely to have a more cautious attitude towards novelty and change.		Prefers novel and experimental approaches. Likely to have a greater affinity for change.
Thinking Style	Creativity	
	1 2 3 4 5 6 7 8 9 10	
More disposed towards a precise thinking process that tends to result in more conventional and concrete ideas.		More disposed to think "outside the box" and have a more free-flowing and abstract trail of thought. Likely to become bored and underperform with repetitive work.

Average to strong on most assessments. Only main flag being on Thinking Style which suggests prefers tried and tested approaches so may need help to be pushed outside of comfort zone.

MARKET MAKING

Excellent effort to perform, and a hard and consistent work rate throughout. A couple of fat fingers led to a volatile PnL and it must be noted that he moved the exchange when unwinding risk. However, in his effort and drive to do well he was an impressive candidate.
